Blu Electronic Cigarette: Intro

[Blu Cigs](#) came into the Electronic Cigarette market relatively later, but honestly, they came in with a BANG. They know how to add value to their products, and it's no wonder they are the highest rated brand on our site.

If you take a good look at their site, you will notice they do not have high markups, outrageous claims or temporary hypes. This is because they care more about the quality, pick only the most researched products, got outstanding looking [e cigarettes](#) and packs, and is the most closest resemblance to an actual cigarette.

I personally am a big fan of the brand, and Blu is what I smoke (switched from Green Smoke). Although taste differs from person to person, I can surely say that the probability you won't like it is very low - provided you are looking for an alternative to regular cigarettes.

Price

Their starter kits are priced at \$59.95, and this is almost half of most of the top brands out there. Many people are discouraged with the high upfront costs with leading brands, but the price for Blu is really reasonable and should not bar one from trying it.

Shipping, Warranty and Guarantee:

- Blu provides free shipping.
- Starter Kits are Guaranteed for 1 year.
- They offer a 100% Money Back Guarantee.

FREE
SHIPPING

30 DAY
MONEY-BACK
GUARANTEE

ONE YEAR
WARRANTY

Overall, these show how confident they are with their products. You should feel free to give them a try, provided you can always send them the kit back within 1 month in case you don't like the taste or feel and claim the money back.

Contents of the Starter Kit

- 1 pack, holds 5 cartridges and charges your batteries on the go!
- 1 electronic cigarette battery & and 1 spare battery
- 1 atomizer & 1 spare atomizer
- 1 wall charger & 1 USB charger
- 25 FREE cartridges in the strength of your choice (equals over 150 cigarettes!)

Even at the very reasonable price of \$59.95, you get an extra battery, an extra charger, a free pack (that's the best feature) and 25 free cartridges. Most starter kits from other brands would offer only 1 battery, 1 charger (either USB or wall mounted), and 5 cartridges.

Exclusive - A Pack that Charges Batteries on the Go

This is the thing I like best about Blu. Apart from looking extremely cool, the pack charges your batteries on the go! The pack can charge upto 6 batteries, and this ensures you never have to run out of power when you are out of your home.

Leaving the cartridges and the batteries in the pack will keep them charged.

Flavors and Nicotine Levels

Flavors offered by Blu are: Classic Tobacco, Magnificent Menthol, Java Jolt, Vivid Vanilla and Cherry Crush. I should specially mention Java Jolt, that is just awesome. Also, the classic flavor is the closest you can get to the real cigarette

taste.

Blue LED Light

Although this might seem a bit irrelevant, but my personal experience has shown that red or orange LED lights (in case of most other brands) attracts others making them think you are smoking a tobacco cigarette. This poses a problem when you are smoking in a no smoking zone. The blue LED in Blu Cigs looks awesome, and people do not mistake it with a real tobacco cigarette.

This is not hard to realize why Blu has become so popular among electronic cigarette lovers. They got awesome quality, excellent looking packs and cigarettes, and moreover, is far cheaper than tobacco cigarettes, and cheaper than most other leading electronic cigarette brands.

Things to Note

There is no perfect cigarette, and every brand has to have some flaws. Here are the ones I noted being a Blu smoker myself.

- Blu, like most [electronic cigarettes](#), is sensitive to air movements. So it is always a good idea to store the cig in its pack, otherwise it might start vaping in your pocket.
- The cartridge life is smaller than what they claim. This is understandable and true for all other brands - they advertise the maximum life under test conditions.
- They are extremely popular, and quite often they are on back log.
